PRISMA - Precision Medicine in Autism

WHAT IS YOUR THING?

By utilizing the world-renowned **InsideOUT platform**, we aim to recognize the members of our autism community by displaying 50 B&W large scale portraits that highlight their faces along with their talents and/or interests to the Providence public. Now it is more important than ever to recognize the individuality and interests of our community members, **making the invisible, visible**. For more information about this event, please contact: molly.goldman@lifespan.org or visit our website www.precisionmedicineinautism.org
